## "Harmony Heights: A Sustainable Community for All"

### ANALYSIS

RELATIONS BETWEEN PLOT AND MEAN OF TRANSPORT

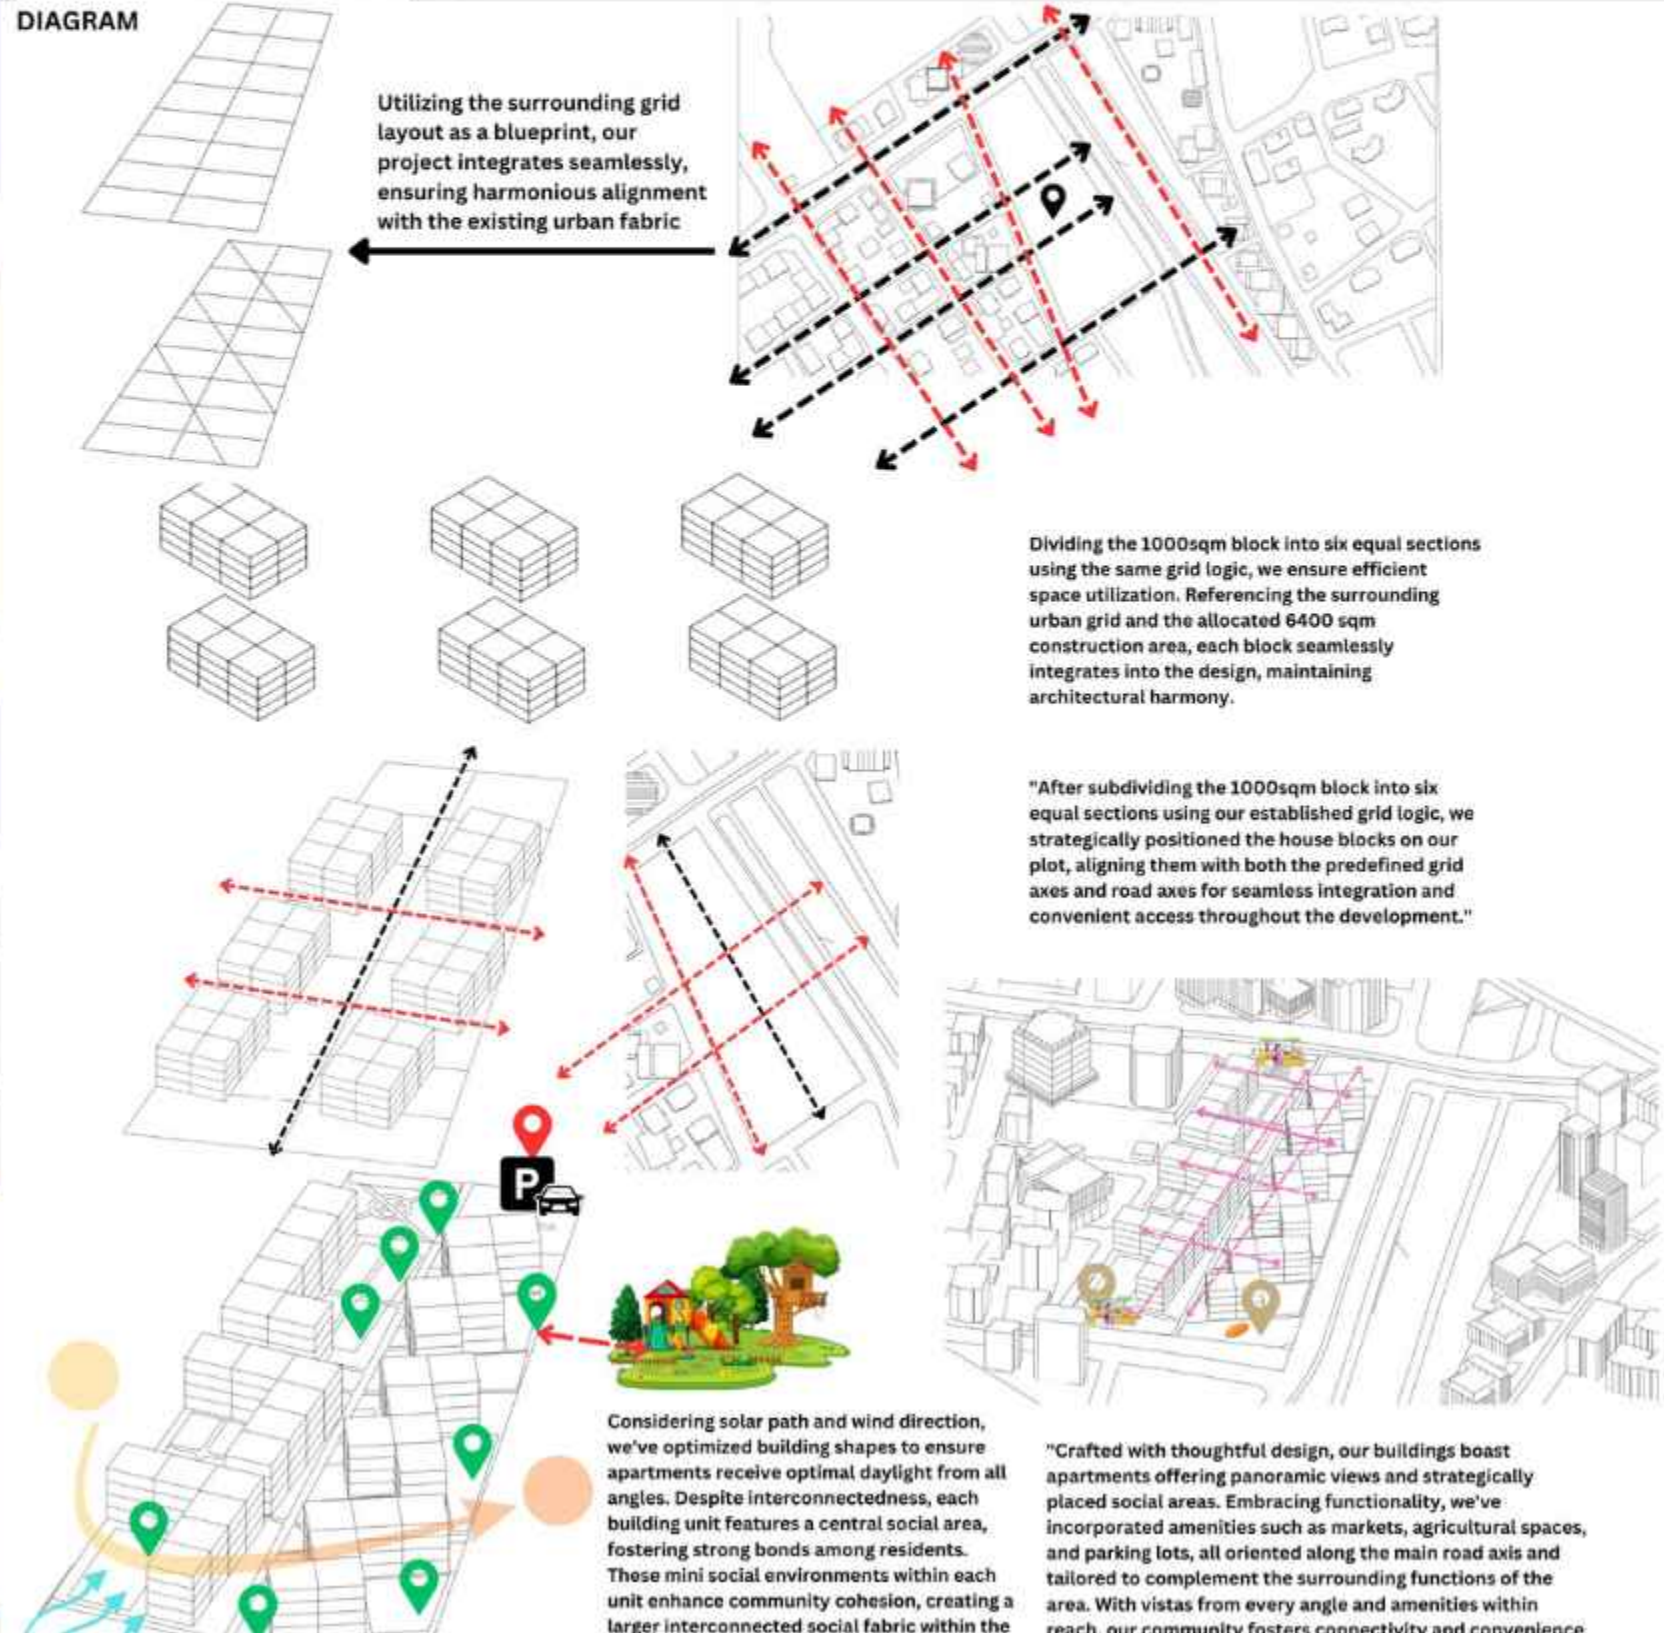

FUNTION ANALYSIS

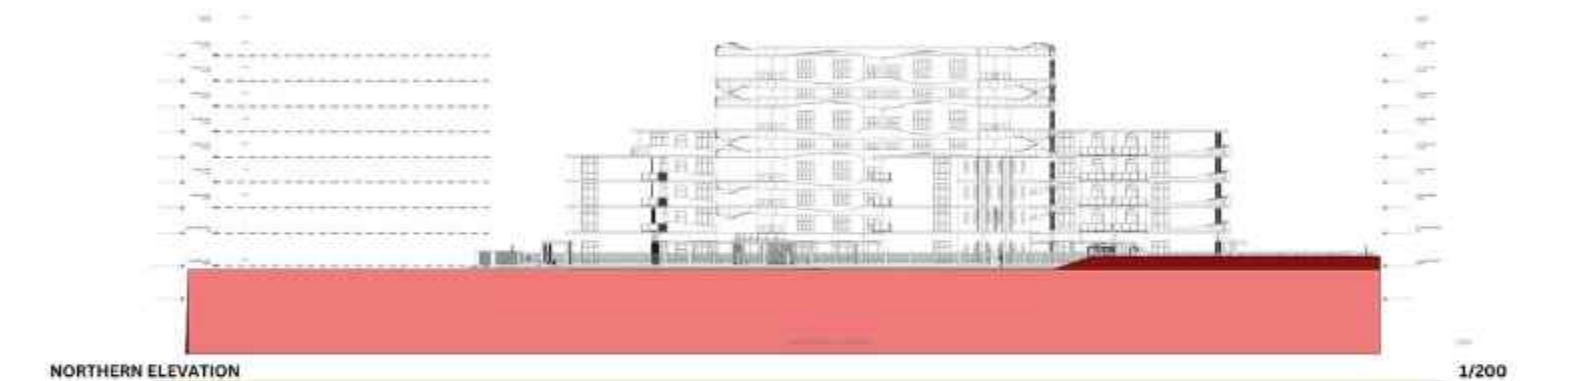

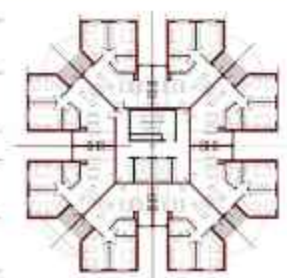

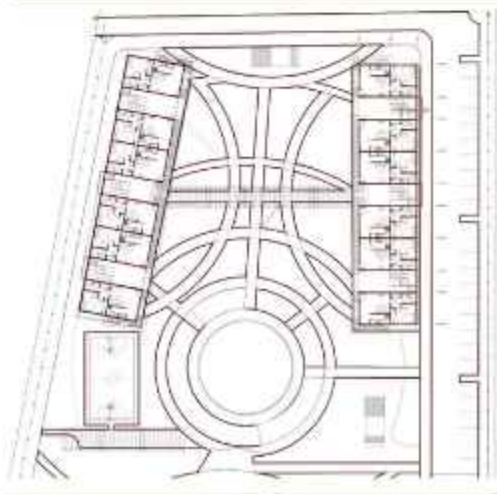

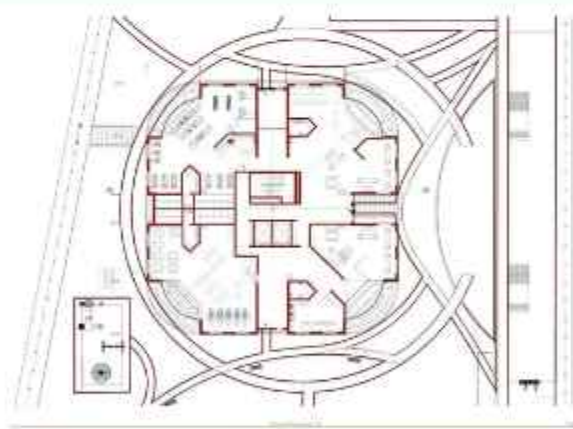

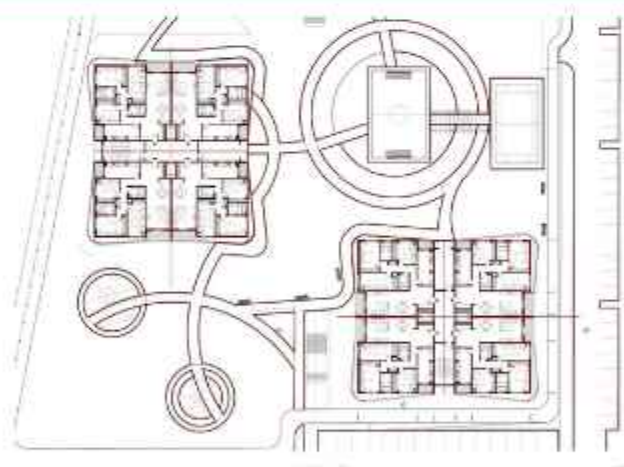

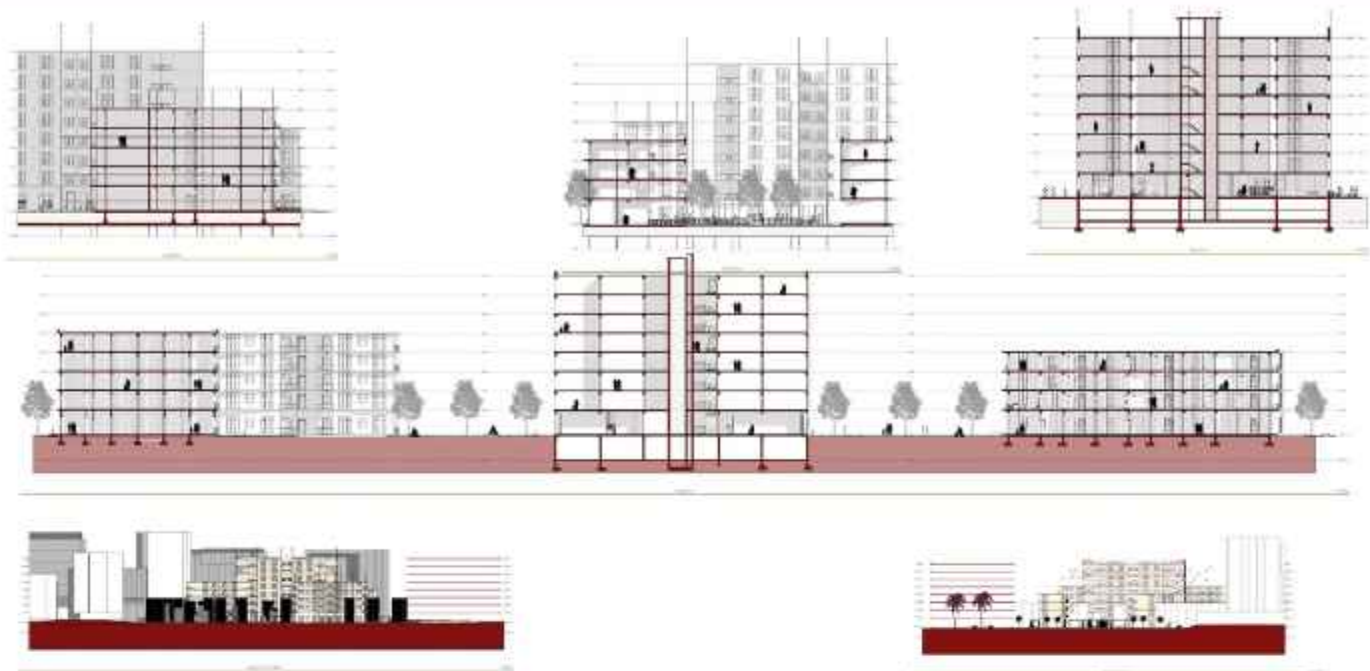

### DESCRIPTION

"Introducing our groundbreaking social housing project, Eco-Loft Living: where sustainability meets community in 3 to 4-floor co-houses. Featuring integrated GoLockers, fostering a culture of sharing and unity among residents. Our rooftop gardens and solar panels ensure a green, self-sufficient environment for all. Join us in redefining social housing with Eco-Loft Living, where every home is a step towards a brighter, more inclusive future."

2024

### DIAGRAM

The residential project, spanning 18,000 square meters, seamlessly blends living spaces with communal amenities. Our design includes:

- **Comfortable Homes:** Thoughtfully designed for privacy and natural light.
- **Cafe-Restaurant:** A cozy spot for socializing and dining.
- **Social Spaces:** Areas for gatherings and recreational activities.
- **Common Areas:** Accessible spots for relaxation.
- **Green Spaces:** Lush areas for children to play and residents to enjoy nature.
- **Community Garden:** A place for residents to grow local crops and connect with nature.

This project aims to foster a vibrant, sustainable community with a focus on comfort and social interaction.
